

GEDORE red offers VDE tools for extensive electrical work Precision and efficiency meet the highest safety standards

Remscheid, 14.12.2023 – Choosing the right and safe tools for specialist work is tremendously important. **GEDORE red** offers the appropriate tools for working on electrical installations to the highest safety standards. With the **StrippMax-Auto stripping pliers** for working on all common flexible and solid conductors, the **VDE 10" Water pump pliers** for screw connections on e.g. control cabinets, and the **VDE Tool assortment** for various bolting, bending and cutting tasks, professionals and DIYers will be perfectly equipped for a wide range of electrical jobs.

The automatic **StrippMax-Auto stripping pliers R28201165 (RRP € 22.59 including VAT)** facilitate the stripping of all common flexible and solid wires from 0.2 to 6 mm². The V-shaped blades automatically adjust to the cable cross-section, allowing wire insulation to be stripped precisely and quickly. Thanks to the ergonomic handle, the low dead weight and the smooth-running mechanics, application requires the minimal effort. A side cutter below the clamp head supports easy cable separations up to a diameter of 2 mm. The stripping pliers are made of glass-reinforced polyamide and high-quality knife steel from Solingen, and the StrippMax-Auto blades are replaceable.

The **VDE 10" Water pump pliers R29100010 (RRP € 28.29 including VAT)** in the version to DIN ISO 8976 Form C adjusts in 7 ways and so adapts to a wide range of workpieces. The longitudinally toothed gripping surfaces ensure a firm grip without unintentional slipping, and the elongated handle enables precise guidance when loosening and tightening bolt connections. The pliers are a universal helper, and should be present in the everyday working life of every DIYer or professional.

Another practical set for electrical work is the 5-piece **VDE Tool range R39002005 (RRP € 62.19 including VAT)** by GEDORE red. As well as two VDE slotted screwdrivers 3 mm and 5.5 mm (design to DIN 5264, DIN ISO 2380) and one VDE screwdriver PH 2 (design to DIN 7438, DIN ISO 8764), it also includes one VDE side cutter 180 mm (design to DIN ISO 5749) and VDE Telephone pliers 200 mm, straight (design to DIN ISO 5745).

Both the water pump pliers and the VDE tool range comply with the requirements of EN/IEC 60900, which guarantees safe working to AC 1,000 V and DC 1,500 V. The VDE-insulated 2-component handles provide a good grip for hand-friendly power transmission and are therefore ideal tools for the many and varied tasks carried out by electricians.
