

"SOLUTIONS" for any challenge in daily workshop life:
the latest GEDORE Automotive promotion is based on a variety of sophisticated tool solutions

GEDORE Automotive, the leading manufacturer of special tools for the automotive industry, presents its latest **promotion: SOLUTIONS**. It comprises 97 top offers for professional in well-organised workshops. Embedded in the accompanying campaign "**Mission: Klann Possible**", GEDORE Automotive emphasises that innovative, safe and efficient tools can also be used to master even the greatest challenges in highly varied daily workshop life. Plus the addition of "**Klann Experience**" to the logo is a reference to the roots from which the branch for the group's automotive competence has arisen: the many years of expertise of Klann Spezial-Werkzeugbau GmbH have been integrated in GEDORE Automotive, and are constantly being developed further.

The new GEDORE Automotive promotion is to run from **1.10.2021 until 31.3.2022**, and consists of 40 pages of well thought-out premium tool solutions for safe and time-saving work at particularly attractive conditions. Clearly presented, **SOLUTIONS** also provides detailed information on selected products. In addition to the durable, practical workshop furniture, the presented top offers also include reliable VDE equipment and universally adaptable implements as well as a variety of other innovative tools for vehicle maintenance and repairs.

The robust and organised **Mounting trolley MODULO 250 KL-4999-250 (SOLUTIONS offer price €6,250.80 € + VAT)**, for instance, appeals as a mobile workplace that contains a comprehensive **114-piece range** of hand tools and drive parts. As the tools are always to hand and the work surface can be used anywhere, wheel bearings, silent bearings, supporting joints and similar items can be changed extremely efficiently. The MODULO also offers additional space for the safe accommodation of further tools. Furthermore, the worktop also serves as the ideal surface for mounting the spring tensioner KL-5501 B.

The infinitely adjustable **Spring tensioner KL-5501 B (SOLUTIONS offer price €2,349.00 + VAT)** can be used to quickly and easily tighten almost any McPherson spring or damping leg available on the market. The construction of the spring tensioner is such that it can be adapted universally to any spring shape and pitch. And it can be safely used by just one person. At the same time, the adjustable quick-release device and plastic clamping jaws on the holding device ensure that it can be used without causing damage.

GEDORE Automotive also offers various new and proven tools for safe working on hybrid and electric vehicles in the **SOLUTIONS** promotion. The **53-piece VDE Tool range Hybrid 1100-1094 (SOLUTIONS offer price €599.00 + VAT)** includes everything required for repairs and maintenance on hybrid and electric vehicles by any manufacturer, ranging from 3/8" reversible ratchets and 3/8" socket bits in key widths 6 to 22 mm to various screwdrivers, pliers and cutting tools. GEDORE's VDE tools are insulated to EN 60900/EC 60900.

The **VDE Accessory set KL-4600-100 K (SOLUTIONS offer price €620.00 + VAT)** is uniquely combined to provide even more safety in the workplace. Fitted out with items such as protective gloves and liners for electricians, Iso stand mat, voltage tester 1,000 V and various warning signs, this set is the perfect complement when working with other GEDORE VDE tools.

As part of **Mission: Klann Possible**, the **GEDORE Automotive** technical pros are also used in the latest **demonstration vehicles**. On request, they will provide live demonstrations of the efficient tools or the appropriate advice from specialists to the workshop.

Further information on **GEDORE Automotive**, **Mission: Klann Possible** and the **SOLUTIONS** promotion can be found at www.gedore.com/de-de/sales-and-promotions/gedore-automotive-promotion.

About GEDORE

GEDORE is one of the world's leading partners for premium tools. The family company based in Remscheid in Germany has been manufacturing high-quality tools, special tools and tailor-made solutions for versatile, safe and professional use by industry and trade since 1919. GEDORE bundles the competencies of the entire group of companies in a strong brand that is known all over the world to stand for very special quality, innovation, performance, reliability and excellent service.

About GEDORE Automotive

In Donaueschingen, GEDORE bundles the industry competence in the assembly, maintenance and repair of passenger and utility vehicles. GEDORE Automotive GmbH is the leading manufacturer of special tools in the automotive sector. Found in 1978, the former Klann Spezial Werkzeugbau GmbH has been a part of the GEDORE Group since 2002, and was fully integrated in the group of companies as GEDORE Automotive GmbH in 2016. GEDORE Automotive tools are used all over the world for effortless and optimised repairs. With over 90 patents and utility models both at home and abroad, GEDORE Automotive is also one of the leading special tool manufacturers in the world. To this end, the company develops innovative tools for all vehicle types in its own test workshop and manufactures them using state-of-the-art technology.
