

Large-format mobile work surface and storage space: Mobile workbench 1507 XL by GEDORE

In any well-organised workshop, it is important to have all the necessary tools close at hand and neatly stored. A mobile workbench with plenty of storage space is the perfect solution for this. It also has a work surface that can be used wherever it happens to be needed. The different versions of the spacious **Mobile workbench 1507 XL** by **GEDORE** with extra-wide, safely designed drawers all offer a particularly generous amount of storage space for tools and equipment. Thanks to the additional strong, large worktop and the maximum total load capacity of 1,000 kg, the mobile workbench meets the high requirements for practical, resilient and flexible workshop furniture.

The GEDORE mobile work bench 1507 XL is made with expertly applied spot welding technology from solid sheet steel. This allows a total load of 1,000 kg (static) or 750 kg (dynamic). With a scratchproof powder coating in GEDORE blue, it is also corrosion-resistant.

The Mobile workbench 1507 XL 40200, for instance, has six large drawers (W 998 x D 474 mm) with guide rails on ball bearings. These ensure safe, smooth operation even with the maximum load capacity of 70 kg per drawer. They are all fully extending to provide easy access to the entire contents and the optimum use of even the smallest corner. The two lower drawers are higher than the others, and so can also accommodate larger items of equipment. The individual drawer locking stops more than one drawer being opened at the same time, ensuring a high level stability of the mobile workbench. The soft self-closure of the drawers makes using them even pleasanter.

Fitted with a push, pull and steer handle for effortless control of the workbench. The high-performance chassis with trapezoidal axle construction and the two GEDORE high-performance wheels (Ø 200 mm) on roller bearings ensure the unit runs smoothly, remains manoeuvrable and keeps to the track even under maximum load. The workbench parks safely with fully locking, smooth-running wheels.

There is plenty of space on the 30-mm-thick panel made of multiplex beech wood (W 1,200 x D 635 mm) for carrying out all sorts of tasks on-site. The surface is varnished in linseed oil for additional protection. As the worktop is offset to the back, the mobile workbench can also be parked flush against a wall. In addition, the worktop is the ideal surface for the mounting kit for the Spring tensioner KL-5501 B - something else that speaks in favour of the Mobile workbench 1507 XL for the automotive sector.

GEDORE's mobile workbenches can also be fitted with preconfigured, filled and individually adapted Check Tool (CT) inserts. The CT inserts in two-tone foam ensure safe storage of the equipment and, at the same time, help the user to check visually that the contents are all present and correct. The large selection of tool modules allows countless options for combining, all optimally adapted to the respective user, workplace and purpose.

There are even more storage options for tools and utensils on the Euro-perforated sides. They are perfect for attaching spray rolls or paper roll holders, tool hooks, clamps and many other items.

The large mobile workbench is a safe and resilient partner for any workshop challenge. As a highlight in the current **MAGIC** promotion, the **GEDORE Mobile work bench 1507 XL 40200** with six drawers is available at particularly attractive conditions (**€1,902.81 including VAT**).
