

Precise and controlled screw tightening for safe wheel changes

The TORCOFLEX UK 1/2" torque wrench set by GEDORE

Remscheid, 30.08.2022 – The right tightening torque is essential when changing wheels on motor and commercial vehicles. Professionals in the workshop therefore need a torque wrench to tighten screw connections that also ensures precise tightening permanently and under considerable loads. The 5-piece **TORCOFLEX UK Set 3550-UK-LS4** by **GEDORE (special price in the current MAGIC promotion €166.48 including VAT)** meets these high requirements. The adjustable torque wrench offers controlled tightening over a range from 40 to 200 Nm, and is the optimum drive tool for socket inserts with a 1/2" square holder. Thanks to the integrated reversible function, the tool is ideal for highly efficient working. Precise clockwise tightening with a high repeat accuracy guarantees a safe screw connection. Tested to DIN ISO 6789:2017-2, the enclosed test certificate confirms the accuracy of the wrench. And even deep-lying screw connections can be reached with the 1/2" extension. The three colour-coded protective sleeves protect delicate surfaces such as aluminium or chrome-plated rims.

In addition to vehicle assembly and repair, GEDORE's torque solutions are also ideal for use in industry and trade.
